DETAILED ACTION

Drawings

Color photographs and color drawings used in figs. 9-26 are acceptable only for examination purposes unless a petition filed under 37 CFR 1.84(a)(2) is granted permitting their use as acceptable drawings. In the event that applicant wishes to use the drawings currently on file as acceptable drawings, a petition must be filed for acceptance of the color photographs or color drawings as acceptable drawings. Any such petition must be accompanied by the appropriate fee set forth in 37 CFR 1.17(h), three sets of color drawings or color photographs, as appropriate, and an amendment to the first paragraph of the brief description of the drawings section of the specification which states:

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the U.S. Patent and Trademark Office upon request and payment of the necessary fee.

Color photographs will be accepted if the conditions for accepting color drawings have been satisfied.

Specification

The specification does not contain a "brief description" of figs. 9-27.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-84 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sloane et al '863.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Using claim 1 for example, Slade creates a psychological "profile" of a user 20 "as a result of interaction with said user (child)" via a self-questionnaire S and data compilation 40 and modifying a scenario for the user during the production of the video 40. Moezzi, Freeman, Jain, Kawano, Chaddha, Wachob, Sitrick, ^{Gunter et al} and Angles show interactive and/or targeted based media.
